2. CHANGES TO ORIGINAL PLAN

Summary of Change	Reason	Impact
The data collection period given in the test plan was from May to June 2022. We modified our data collection to occur over the year.	We modified the data collection period so that we could monitor the data and ensure that by the end of the year, we were able to demonstrate the real world capabilities of our product.	This change allowed us to show the real world capabilities of our product. We worked with our users to use our product features that were underutilized.

3. SUMMARY OF TESTING METHODS AND KEY FINDINGS

The care settings used by GeniusDoc EHR for Real World testing were Oncology, Rheumatology, and Pulmonary. Most of the Real World testing scenarios are tested on these specialties to demonstrate the success of interoperability criteria.

The certified criteria are available to all the providers from the start of the year and users could utilize them per their needs. Also, the training is provided to the users.

The logs are verified to determine how often providers use the functions of Real World testing. The findings are mixed as some of the criteria are heavily used and others are not used at all. The criteria which are low in number may require further training and facilitation to providers for the adoption of certified criteria.

4. STANDARDS UPDATES (INCLUDING SVAP AND USCDI)

Both required and voluntary standards updates must be addressed in the Real-World Testing plan. Real World Testing plans must include all certified health IT updated to newer versions of standards prior to August 31 of the year in which the updates were made. Indicate as to whether optional standards, via SVAP and/or USCDI, are leveraged as part of the certification of your health IT product(s).

- Yes, I have products certified with voluntary SVAP or USCDI standards. (If yes, please complete the table below).
- No, none of my products include these voluntary standards.

Standard (and version)	
Updated certification criteria and associated product	
Health IT Module CHPL ID	
Conformance measure	

5. CARE SETTINGS

The care settings which were tested are:

- Oncology
- Rheumatology
- Pulmonary

Note: The product functionality is common for all other specialties as well.

6. METRICS AND OUTCOMES

Measurement /Metric	Associated Criterion(a)	Relied Upon Software (if applicable)	Outcomes	Challenges Encountered (if applicable)
Care Coordination	170.315(B)(1) Transitions of Care 170.315(B)(2) Clinical Information Reconciliation and Incorporation 170.315(H)(1) Direct Project	SureScripts	The Total number of CCDAs sent out electronically is 101 out of 200 (50.5%). The total count of successful reconciliation of problems, medications, and medication allergies is 15 out of 15 (100%).	
Care Coordination	170.315(B)(3) Electronic Prescribing	SureScripts, Best Sync	The total no. of prescriptions sent out electronically is 18761 out of 19622 (95.53%).	
Care Coordination	170.315(B)(6) Data Export		There was no utilization for this measure in this testing period.	We have tested the functionality successfully on our test environment. However, none of our clients are using it.
Clinical Quality Measures	170.315(C)(1) Clinical Quality Measures (CQMS) - Record and Export 170.315(C)(2) Clinical Quality Measures (CQMS) - Import and Calculate 170.315(C)(3) Clinical Quality		All our clients use MIPS CQM measures for reporting MIPS Quality data. eCQM measures were not used by any of our clients in this testing period.	We have tested the functionality successfully on our test environment. However, none of our clients are using it.

	Measures (CQMS) - Report			
Patient Engagement	170.315(E)(1) View, Download and Transmit to 3rd Party		The total no of patients who are provided timely access to view, download, or transmit their health data is 15992 out of 15992 (100%).	
Public Health	170.315(F)(1) Transmission to Immunization Registries		The total no. of patient immunization records submitted to the registry is 856. We found 100% successful transmission rate.	
Public Health	170.315(F)(2) Transmission to Public Health Agencies - Syndromic Surveillance		There was no utilization for this measure in this testing period.	We have tested the functionality successfully on our test environment. However, none of our clients are using it.
Public Health	170.315(f)(4) Transmission to Cancer Registries		There was no utilization for this measure in this testing period.	We have tested the functionality successfully on our test environment. However, none of our clients are using it.
Application Programming Interfaces	170.315(G)(7) Application Access - Patient Selection 170.315(G)(8) Application Access - Data Category Request 170.315(G)(9) Application Access- All Data Request		There are no active API Interfaces. This measure applies to all our targeted practice settings as the API capabilities work the same for all sites.	Since this feature is not used by our clients, we have tested this capability in the live system by creating test patients. This method has verified that the functionality is working for end users.

7. KEY MILESTONES

Key Milestone	Care Setting	Date/Timeframe
Real World Test Plan preparation and submission.	Oncology, Rheumatology, and Pulmonary	September 29, 2021
Begin collection of information for all the care settings.	Oncology, Rheumatology, and Pulmonary	January 1, 2022
End of Real World Testing period – Final collection of all data for analysis for all care settings.	Oncology, Rheumatology, and Pulmonary	January 1, 2023
Final analysis and report creation	Oncology, Rheumatology, and Pulmonary	February 2, 2023
Submission of Real World Testing report.	Oncology, Rheumatology, and Pulmonary	February 10, 2023

8. ATTESTATION

This Real World Testing plan is complete with all required elements, including, measures that address all certification criteria and care settings. All information in this plan is up to date and fully addresses the health IT developer's Real World Testing requirements.
