## TABLE OF CONTENTS

1.	GENERAL INFORMATION .....	2
2.	CHANGES TO ORIGINAL PLAN .....	2
3.	SUMMARY OF TESTING METHODS AND KEY FINDINGS .....	2
4.	STANDARDS UPDATES (INCLUDING SVAP AND USCDI) .....	3
5.	CARE SETTINGS .....	3
6.	METRICS AND OUTCOMES.....	4
7.	KEY MILESTONES .....	6
8.	ATTESTATION .....	6

## 1. GENERAL INFORMATION

<b>Report ID Number</b>	20221116ged
<b>Developer Name</b>	GeniusDoc, Inc.
<b>Product Name(s)</b>	GeniusDoc
<b>Version Number(s)</b>	12.0 (current), 11.0 (previous)
<b>Certified Health IT Product List (CHPL) ID(s)</b>	15.02.05.1529.GDOC.01.01.1.211209
<b>Developer Real World Testing PLAN Page URL</b>	<a href="https://www.geniusdoc.com/RealWorldTesting.php">https://www.geniusdoc.com/RealWorldTesting.php</a>
<b>Developer Real World Testing RESULTS Page URL</b>	<a href="https://www.geniusdoc.com/RealWorldTesting.php">https://www.geniusdoc.com/RealWorldTesting.php</a>

## 2. CHANGES TO ORIGINAL PLAN

Summary of Change	Reason	Impact
The data collection period given in the test plan was from May to July 2023. We modified our data collection to occur over the year.	We modified the data collection period so that we could monitor the data and ensure that by the end of the year, we were able to demonstrate the real world capabilities of our product.	This change allowed us to show the real world capabilities of our product. We worked with our users to use our product features that were underutilized.

## 3. SUMMARY OF TESTING METHODS AND KEY FINDINGS

The care settings used by GeniusDoc EHR for Real World testing were Oncology, Rheumatology, and Pulmonary. Most of the Real World testing scenarios are tested on these specialties to demonstrate the success of interoperability criteria.

The certified criteria are available to all the providers from the start of the year and users could utilize them per their needs. Also, the training is provided to the users.

The logs are verified to determine how often providers use the functions of Real World testing. The findings are mixed as some of the criteria are heavily used and others are not used at all. The criteria which are low in number may require further training and facilitation to providers for the adoption of certified criteria.

#### 4. STANDARDS UPDATES (INCLUDING SVAP AND USCDI)

Both required and voluntary standards updates must be addressed in the Real-World Testing plan. Real World Testing plans must include all certified health IT updated to newer versions of standards prior to August 31 of the year in which the updates were made. Indicate as to whether optional standards, via SVAP and/or USCDI, are leveraged as part of the certification of your health IT product(s).

- Yes, I have products certified with voluntary SVAP or USCDI standards. (If yes, please complete the table below).
- No, none of my products include these voluntary standards.

Standard (and version)	This product utilizes all standards associated with the 2015 Cures update certification method
------------------------	--

#### 5. CARE SETTINGS

The care settings which were tested are:

- Oncology
- Rheumatology
- Pulmonary

Note: The product functionality is common for all other specialties as well.

## 6. METRICS AND OUTCOMES

Measurement /Metric	Associated Criterion(a)	Relied Upon Software (if applicable)	Outcomes	Challenges Encountered (if applicable)
Care Coordination	170.315(B)(1) Transitions of Care  170.315(B)(2) Clinical Information Reconciliation and Incorporation  170.315(H)(1) Direct Project	SureScripts	The Total number of CCDAs sent out electronically is 17.  The total count of successful reconciliation of problems, medications, and medication allergies is 8.	
Care Coordination - eRx	170.315(B)(3) Electronic Prescribing	SureScripts, Best Sync	The total no. of prescriptions sent out electronically is 18050.	
Care Coordination	170.315(B)(6) Data Export		There was no utilization for this measure in this testing period.	We have tested the functionality successfully on our test environment. However, none of our clients are using it.
Clinical Quality Measures - CURES	170.315(C)(1) Clinical Quality Measures (CQMS) - Record and Export  170.315(C)(2) Clinical Quality Measures (CQMS) - Import and Calculate  170.315(C)(3) Clinical Quality Measures (CQMS) - Report		All our clients use MIPS CQM measures for reporting MIPS Quality data.  eCQM measures were not used by any of our clients in this testing period.	We have tested the functionality successfully on our test environment. However, none of our clients are using it.

Patient Engagement	170.315(E)(1) View, Download and Transmit to 3rd Party		The total count of patients who log into their patient portal to view, download, or transmit their health data is 16246.	
Public Health- Immunization Registries	170.315(F)(1) Transmission to Immunization Registries		There was no utilization for this measure in this testing period.	We have tested the functionality successfully on our test environment. However, none of our clients are using it.
Public Health- Syndromic Surveillance	170.315(F)(2) Transmission to Public Health Agencies – Syndromic Surveillance		There was no utilization for this measure in this testing period.	We have tested the functionality successfully on our test environment. However, none of our clients are using it.
Public Health- Cancer registries	170.315(f)(4) Transmission to Cancer Registries		There was no utilization for this measure in this testing period.	We have tested the functionality successfully on our test environment. However, none of our clients are using it.
Application Programming Interfaces	170.315(G)(7) Application Access - Patient Selection  170.315(G)(9) Application Access- All Data Request		There are no active API Interfaces.  This measure applies to all our targeted practice settings as the API capabilities work the same for all sites.	Since this feature is not used by our clients, we have tested this capability in the live system by creating test patients. This method has verified that the functionality is working for end users.

## 7. KEY MILESTONES

Key Milestone	Care Setting	Date/Timeframe
Real World Test Plan preparation and submission.	Oncology, Rheumatology, and Pulmonary	November 7, 2022
Begin collection of information for all the care settings.	Oncology, Rheumatology, and Pulmonary	January 1, 2023
End of Real World Testing period – Final collection of all data for analysis for all care settings.	Oncology, Rheumatology, and Pulmonary	January 1, 2024
Final analysis and report creation	Oncology, Rheumatology, and Pulmonary	February 9, 2024
Submission of Real World Testing report.	Oncology, Rheumatology, and Pulmonary	February 16, 2024

## 8. ATTESTATION

This Real-World Testing results report is complete with all required elements, including. measures that address all certification criteria and care settings. All information in this results report is up to date and fully addresses the health IT developer's Real World Testing requirements.
